

WE LEAD EMERGING TECHNOLOGIES

They allow us to look
beneath the surface and
drill down to what really

CORE LOGGING, EXPLORATION, & DRILLING MANAGEMENT

As a world-renowned integrated technology solutions provider, RESPEC's dynamic team works with international clientele to design and manage large-scale drilling programs, including drilling management, exploration drilling, core logging, and other geological services. Our drilling management and full-procurement drilling programs offer comprehensive services, from well and casing design for exploration wells to providing experienced engineers to design and complete disposal wells.

RESPEC's distinguished team obtains and compares bids from drilling contractors and service and supply companies. We manage the entire drilling program—from site environmental review survey and construction of locations to acquiring approval for well licenses from regulatory agencies.

CORE LOGGING CAPABILITIES:

- // Well and Casing Design for Exploration Wells
- // Bid Management
- // Site Environmental Regulation Review
- // Survey and Construction of Location
- // Well Licenses From SMER, ERCB, and OGC
- // National Instrument (NI) 43-101 or NI 51-101 Compliant
- // Daily Cost Management and Drilling Reports
- // Certified Wellsite Supervisors
- // Full-Procurement Drilling

RESPEC FACILITIES:

- // Materials Testing Laboratory
- // Core Laboratory
