

CREATING A FUTURE BY RECLAIMING THE PAST.

Our extensive knowledge and experience in restoration and reclamation projects benefit clients in need of practical mining and environmental expertise.

MINE RECLAMATION

Creative, reliable, and economical, we oversee the design and management of the reclamation for both active and abandoned mine sites. Our interdisciplinary team of experts delivers sound solutions that restore these sites back into productive use while minimizing adverse environmental impacts.

Since 1985, RESPEC's services have resulted in the reclamation of thousands of acres of Abandoned Mine Land (AML) sites throughout the US. We have received multiple national reclamation awards based on our cutting-edge approaches and designs from the US Department of the Interior, Office of Surface Mining, Reclamation and Enforcement Division. Our services in reclamation, remediation, construction management, project management, permitting, engineering, design, and regulatory compliance are integral elements of RESPEC's cost-saving and successful engineering program.

MINE RECLAMATION CAPABILITIES:

- // Risk Evaluation
- // Management
- // Investigation
- // Design
- // Consultation
- // Construction-Management Services
- // Contract Documents
- // Regulatory Knowledge
- // Stability Analyses
- // Geological Hazard Assessments
- // Subsidence Monitoring and Interpretation
- // Highwall Reclamation Designs
- // Carlson Natural Regrade Design
