

# YOU'RE NOT MADE OF MONEY BUT OUR SOLUTIONS ARE MADE FOR IT.

Smooth transaction processing can't just be optional. Your business depends on it. All of the time. Every time.

## PAYMENT PROCESSING

Payment Processing is an intricate procedure to ensure that both the customer and merchant can initiate transactions and that those transactions are reliably and promptly processed and received. In a large enterprise, payment processing can become extremely complex and costly with multiple point-to-point integrations, multiple billing systems, and payment entry systems.

As experts in monetization, RESPEC has years of experience in working with a multitude of payment processing systems and aggregators. To address the complex needs of the large enterprise, we have designed and built secure, error-resistant payment processing platforms that are scalable, resilient and extensible.

From technical standards, industry regulations, compliance, and security—we can help you stay on top of it all while streamlining payment processing.

### PAYMENT PROCESSING CAPABILITIES:

- // Full payment life-cycle support (reconciliation, chargebacks, returns, and refunds)
- // Pluggable architecture to accommodate multiple payment processors, billing systems, and payment channels
- // Microservices to provide resiliency and scalability
- // Support for digital wallets such as GooglePay and ApplePay
- // Real-time and batch payment processing
- // Fully PCI compliant
